

Danil Shkerdin

Senior QA Automation Engineer | Tech Lead | AI-Assisted Testing

📍 Remote | ✉️ Danila.shkerdin.01@mail.ru | 📞 +79536279400 | 💬 Telegram: dashkerdin 🔗 GitHub: <https://github.com/danilashkerdin>

ABOUT

Senior QA Automation Engineer with 5+ years in fintech, payments, and mobile testing. Currently leading a team of 5 engineers at WB Bank, building the automation process from scratch and driving quality metrics across the stack.

- AI-assisted QA: use Opencode, Deepseek, Claude Code daily for test design, failure analysis, and test data generation
- Build AI tools for development and testing: Mock Manager, AI agent for auto-generated tests (coverage 30% → ~90%)
- Frameworks from scratch: backend (Python), mobile (Kotlin/Appium)
- CI/CD quality pipelines, DDE, coverage, autotest stability, execution time
- AI speedups: ~90% faster docs and data prep, ~50% faster MR reviews
- Leadership: mentoring, code reviews, workshops

Focus: AI-driven quality, AI tools for development and testing, fintech, technical leadership.

SKILLS

Area	Technologies
Languages	Python, Kotlin, TypeScript/JavaScript
Mobile	Appium, Android SDK, iOS/Android testing, Emulators
Backend & API	FastAPI, Pytest, REST API, Postman, microservices
AI tools for dev & test	Opencode, Deepseek, Claude Code, LLM integration, AI-assisted code review, prompt engineering, AI test generation
CI/CD & DevOps	GitLab CI, GitHub Actions, Docker, Kubernetes, Allure
Testing	Functional, integration, regression, performance, load, E2E, BDD, RCA
Leadership	Team management, mentoring, code review, technical strategy

EXPERIENCE

WB Bank (Wildberries Bank) — Senior QA Automation Engineer / Tech Lead | *Present*

- Lead a team of 5 QA engineers: mentoring, code reviews, technical strategy
- Design AI tools for testing: **Mock Manager** (test environment management) and an AI agent for auto-generated tests
- Increased unit test coverage from 30% to ~90% in a year using an AI agent for test automation
- Wrote integration and E2E scenarios from scratch; introduced coverage measurement in CI and automated test runs on every MR

- Cover the full stack: backend (Python), mobile (Kotlin/Appium), API, integration, regression, performance
- Drive quality metrics: DDE, defect density, test coverage, autotest stability, execution time
- Use AI (Opencode, Deepseek, Claude Code) daily: test design, log/failure analysis, test data generation
- Reduced test documentation and data prep time by ~90%, MR review time by ~50% using AI agents
- Own CI/CD quality pipelines (GitLab CI, GitHub Actions), Allure reporting, flaky test management

Yandex.Fintech — SDET (DWH Project) | 2024–2025

- Validated ETL pipelines and analytical models on a DWH project in fintech
- Built integration and E2E test suites in GitLab CI; owned test execution pipelines
- Validated banking and payment microservices with 99.9% uptime requirements
- Used Kotlin and Appium for mobile testing of fintech flows
- Adopted AI tools to speed up failure analysis and test data preparation

T-Bank — Automation QA Engineer | 2023–2024

- Automated validation for a partner acquisition platform handling 10,000+ external integrations
- Built API and integration test suites; implemented test data setup and teardown utilities
- Reduced post-release critical bugs by 25% through early test involvement

MTS — Intern → Middle QA (Internal Products) | 2022–2023

- Promoted from intern to Middle QA within 18 months
- End-to-end quality ownership for 3 internal services
- Created and delivered internal test automation courses for 10+ junior colleagues

PROJECTS

SaaS for Marketplace Sellers (Ozon, WB, Yandex.Market) — Founder / Full-stack Engineer | *Side project*

- Building a SaaS for seller-side automation on major marketplaces
- Integrating Ozon, Wildberries, Yandex.Market APIs: orders, stock, pricing, returns

Sports Gamification Startup (Early-stage, NDA) — Mobile QA Engineer | *Side project*

- Developed a mobile app from scratch, published to App Store and Google Play
- Tested iOS and Android: functional, regression, in-app purchases

EDUCATION

Moscow Technical University of Communications and Informatics (MTUCI) Automation of Business Processes. Computer Security.

ADDITIONAL

- **Languages:** English (professional working proficiency), Russian (native)
- **Availability:** 2 weeks notice
- **Preferred collaboration:** B2B / Contract (ИП)
- **Remote-ready:** Full setup for distributed collaboration
